COMPARE DRAIN REPAIR QUOTES

Compare the same fault and pipe section, not just the lowest total. Mark each item: I = included, E = excluded, ? = not stated. Ask for missing details in writing.

WHAT TO COMPARE	QUOTE A	QUOTE B
Scope matches the inspection Same defect and agreed start/end points.		
Preparation and access Cleaning, connections and access digging.		
Surface reinstatement Spoil removal and who makes good the surface.		
Full comparable price GST, allowances, exclusions and extra charges.		
Changes agreed in writing How extra work is priced and approved.		
Disruption explained Fixture restrictions and site access programme.		
Completion evidence and cover Checks, footage/report and written warranty terms.		

Before approving work

Ask why the method suits your drain, what remains outside the scope and which written terms apply. A patch and a longer-run reline are not automatically like-for-like.
